

RUPESH SANJAY SHETE

Pune, Maharashtra, India | rupeshshete18@gmail.com | linkedin.com/in/rupesh-shete | github.com/Rupesh1819

PROFESSIONAL SUMMARY

Final-year B.E. Computer Engineering student at G. S. Moze College of Engineering, Pune, with hands-on experience in Machine Learning, Data Science, and Generative AI. Skilled in building and deploying end-to-end ML/AI applications using Python, Scikit-learn, LangChain, RAG, and Streamlit. Completed three internships delivering predictive models, EDA pipelines, and Streamlit-based AI products. Passionate about LLM engineering, AI application development, and building intelligent systems that solve real-world problems. Seeking an entry-level AI/ML Engineering or Data Science role to drive impactful, production-ready solutions.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java (Basic)

AI & Machine Learning: Supervised & Unsupervised Learning, Deep Learning (Basics), NLP, Feature Engineering, Model Evaluation, Hyperparameter Tuning, SHAP (Explainable AI)

Generative AI & LLMs: LLMs, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, ChatGPT, DALL·E

Data Science: Data Analysis, Statistical Analysis, EDA, Data Preprocessing, Data Visualization

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow (Basic), Streamlit, Flask

Databases: MySQL, PostgreSQL, Supabase

Web Development: HTML, CSS, JavaScript, React (Basic)

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Colab

WORK EXPERIENCE

Data Science Intern | CodeB Solution Pvt. Ltd.

Remote | 2026 (2 Months)

- Built and evaluated 5+ machine learning classification models using Python and Scikit-learn, achieving up to 97% accuracy across tasks.
- Engineered features and performed end-to-end EDA on structured datasets, reducing data noise and improving model input quality by ~30%.
- Developed and deployed interactive ML web applications using Streamlit and Flask, enabling non-technical stakeholders to access predictions in real time.
- Applied SHAP (SHapley Additive exPlanations) for model interpretability, increasing stakeholder trust by clearly visualizing feature impact.

Machine Learning Intern | Growmore Pvt. Ltd.

Remote | 2026

- Developed machine learning solutions using Python and Scikit-learn for structured business datasets, achieving measurable accuracy improvements.
- Conducted data preprocessing, feature engineering, and comparative algorithm analysis across 4+ ML models to identify optimal approaches.
- Optimized model performance via systematic hyperparameter tuning (GridSearchCV), reducing error rates by ~15% over baseline models.

Machine Learning Intern | Amdox Technologies

Remote | 2026 (1 Month)

- Contributed to an AI-powered task optimization project, building predictive models that improved scheduling efficiency.
- Performed feature engineering and model performance evaluation, meeting project KPIs within the delivery timeline.
- Collaborated using Git and followed industry-standard version control and development practices throughout the project lifecycle.

PROJECTS

Phishing Website Detection System | Python · Scikit-learn · Pandas · NumPy · SHAP · Streamlit

- Engineered an end-to-end phishing detection pipeline processing 10,000+ URLs, achieving 98% classification accuracy with XGBoost.
- Applied SHAP for model explainability and performed comparative evaluation across 5 ML algorithms with hyperparameter tuning.
- Deployed a real-time prediction web app using Streamlit, enabling instant URL safety checks with visual feature explanations.

GitHub: github.com/Rupesh1819

Sentiment Analysis using NLP | Python · BERT · Hugging Face · PyTorch

- Developed a BERT-based sentiment analysis model to classify 28 emotions using the GoEmotions dataset.
- Implemented an end-to-end NLP pipeline including text preprocessing, BERT tokenization, model fine-tuning, and emotion prediction with confidence scores.
- Fine-tuned the bert-base-uncased model using PyTorch, AdamW optimizer, and learning rate scheduling to improve classification performance.

Movie Recommendation System | Python · Pandas · Scikit-learn · Cosine Similarity

- Developed a content-based filtering recommendation engine using cosine similarity on movie metadata (genre, cast, keywords).
- Preprocessed and vectorized metadata for 5,000+ movies, returning top-N personalized recommendations with an interactive UI.

GitHub: github.com/Rupesh1819

CryptoVision — Crypto Analytics Dashboard | Python · Streamlit · REST APIs

- Built a real-time cryptocurrency analytics app integrating live market APIs to track prices, trends, and volatility across 20+ coins.
- Designed interactive dashboards with dynamic charts and filters, enabling users to monitor market movement without external tools.

GitHub: github.com/Rupesh1819

Gold Gallery Website | [Link](#)

- Designed and developed a fully responsive jewellery showcase website with product categorization and intuitive navigation.
- Implemented mobile-first design principles ensuring consistent UI/UX across all screen sizes.

EDUCATION

B.E. in Computer Engineering (Final Year) | CGPA: 7.7

G. S. Moze College of Engineering, Balewadi, Pune | 2023 – 2027

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

HSC (Class XII) | 68%

SSC (Class X) | 90.20%

CERTIFICATIONS

Generative AI Training | Capgemini | Nov 2025

- Covered LLMs, Prompt Engineering, AI tools (ChatGPT, DALL·E), and real-world Generative AI application development.

The Ultimate Job-Ready Data Science & ML Course | Udemy

- Comprehensive coverage of Python, Data Analysis, Scikit-learn, NLP, LLMs, and RAG for production-ready AI/ML development.

ACHIEVEMENTS & HIGHLIGHTS

- Built and deployed 5+ end-to-end AI/ML projects solving real-world problems across cybersecurity, NLP, and recommendations domains.
- Active GitHub contributor with public repositories in AI, Machine Learning, and Web Development (github.com/Rupesh1819).
- Completed three ML/Data Science internships within the final year of B.E., gaining practical exposure to production-grade ML workflows.
- Strong academic foundation — 90.80% in SSC — demonstrating consistent aptitude in STEM subjects.
- Proficient in building explainable AI systems using SHAP, bridging the gap between model performance and stakeholder communication.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Active participant in college-level technical events, coding competitions, and AI/ML workshops.
- Peer knowledge-sharing on AI and Data Science topics within the college technical community.
- Pursuing continuous self-learning in LLM engineering, RAG systems, and production AI development through structured online programs.
